

## Create My Portfolio page

1. Create HTML page that use **Bootstrap** framework for your portfolio start with navbar then first section contain your name and brief about yourself **paly with text colors and size** 😊

2. Second section use **Grid system** to display images from your previous work and brief on each project then when I hover on text I will get the project name  
lg => 3 projects per row  
md => 2 projects per row  
sm => 1 projects per row

3. Footer using Grid system contain site map then 2 columns first col (home, about, contact us) second col (github, linkedIn) Then next row add icons or images of your social media and finally add **centered** copyright text use next Screenshot as guide
